

# Mystic spray tan

The perfect glow is closer than you think!

Our UV-Free Mystic Spray Tan allows you to enjoy beautifully bronzed skin in seconds. Mystic is the only spray-on tanning system that utilizes MagneTan™ technology, ensuring a consistent, streak-free glow each and every time. Benefits of Mystic include:

- UV-Free technology
- No melanin production
- A deep, natural looking glow that takes seconds and lasts 5-7 days

Designed to help you look great, Mystic uses MagneTan technology, a patented process that uses the body's natural magnetic properties to give you an even, natural glow all over.

Results are comparable to a day in the sun or a UV therapy session but with less risk and in far less time.

*The Mystic Spray Tan is just perfect for me. I am in and out in no time at all. So I make sure to get a Mystic before every special occasion to make sure I look my best.*
