

Whiter Image teeth whitening

Pearly whites can be yours in just 15 minutes!

Our Whiter Image teeth whitening system offers one of the most advanced systems available today. The safe, fast and convenient system features both teeth color correction and teeth whitening capability to:

- Provide a brighter, whiter smile
- Remove discoloration due to tobacco, coffee, and wine stains
- Achieve 4-6 shades whiter in one session
- Whiten both upper and lower teeth

Designed for superior teeth whitening capabilities, the Whiter Image system uses only premium grade L.E.D. whitening light to deliver the five essential elements needed for teeth whitening: Peroxide, Pressure, Light, Heat and Exposure.

Results are comparable to other cosmetic teeth whitening services, but at a more reasonable price and with no medical risk, side effects or down time. Get a smile that dazzles!

After years of smoking and drinking coffee, my teeth were very discolored and I was pretty self-conscious. My wife recommended trying Whiter Image by Planet Beach, so I gave it a try. I thought it would take several sessions, but results were immediate! I've done a few sessions now and my teeth are whiter than ever!
